## PROFILE SUMMARY

---

Electrical and Electronics Engineering (EEE) student with hands-on experience in React.js, CSS, HTML, JavaScript, and Node.js and Python. Skilled in building and troubleshooting full-stack web applications using React, Node.js, Python, and SQL. Experienced in debugging REST APIs, integrating third-party services, and resolving technical issues through systematic root-cause analysis — directly applicable to customer-facing support and integration engineering roles.

## EDUCATION

---

### NxtWave Disruptive Technologies

Industry Ready Certification in Full-stack Development

Jan 2024 - Present

### Jawaharlal Nehru Technological University College of Engineering, Kakinada

2022 - 2026

B Tech - Electrical & Electronics Engineering (EEE)

CGPA: 7.5

## SKILLS

---

**Frontend:** HTML, CSS, Bootstrap, JavaScript, React.js

**Backend:** Express.js, Node.js, Python

**Databases:** MongoDB, SQL, SQLite

**Core Concepts:** DSA, OOP, REST APIs, Real-Time Systems

**Tools:** Git, GitHub, n8n (workflow automation), VS-code

## INTERNSHIP EXPERIENCE

---

### CodTech IT Solutions | Web Dev Intern (1month)

Developed and debugged responsive web features using HTML, CSS, and JavaScript, reducing reported UI defects by identifying root causes through systematic troubleshooting. Integrated Node.js backend APIs, performed API testing using Postman, and resolved cross-browser compatibility issues.

## PROJECTS

---

### AI Wiki Quiz Generator (Live link: <https://ai-wikki-quiz-gen.vercel.app/>)

- Developed an AI-powered application that converts Wikipedia content into interactive quizzes in real-time.
- Built a content extraction and processing pipeline to generate structured MCQs from unstructured data.
- Integrated LLM APIs for dynamic, context-aware question generation.

**Technologies used:** React.js, Python, REST APIs, LLM APIs

### Collaborative Text Editor (Live link: <https://collabrative-text-editor-2.onrender.com/>)

- Developed a real-time collaborative text editor enabling multiple users to edit documents simultaneously with live synchronization.
- Implemented live synchronization using WebSockets.

- Designed logic to handle concurrent edits and reduce conflicts.
- Built interactive frontend using React for seamless editing experience.
- Optimized performance for real-time updates across users.

**Technologies used:** React, HTML, Bootstrap, CSS, Node.js, WebSockets

### **Real-Time Chat Application (<https://realtimechatapplication-2-d98v.onrender.com/> )**

Built a scalable full-stack real-time messaging application enabling instant communication between users.

- Implemented JWT-based authentication and secure user sessions.
- Developed RESTful APIs using Express.js for handling user and message data.
- Integrated real-time messaging using WebSockets (Socket.io).
- Designed responsive UI and optimized state handling in React.
- Ensured low-latency message delivery and seamless user experience.

**Technologies used:** React, Node.js, and Web Sockets, Express.js

### **CERTIFICATES AND ACHIEVEMENTS**

---

- **Career Essentials in Generative AI** – Microsoft & LinkedIn (*Mar 2026*)
- Smart Interviews – Data Structures & Algorithms
- NxtWave OpenAI Buildathon – *Student Companion Project*
- Generative AI Mastery Workshop – NxtWave
- Participated in VIT Hackathon & NxtWave Buildathon
- Developed College Fest Website (Branch-Level Project)
